TransPort Integrator: The Solution Moving Forward

This New Transportation Management Tool Increases Freight Shipment Efficiency

An Overview for Agencies

Introduction to TransPort Integrator

TransPort Integrator is GSA's new, easy-to-use transportation management solution. This Web-based application was specially engineered to help your agency meet its transportation needs and will replace GSA's Transportation Management Services Solution (TMSS). TransPort Integrator provides a suite of services and advanced management tools that promote efficiency during shipment creation, planning, tendering, execution and reporting – all in a single solution and free of charge!

Benefits of Using TransPort Integrator

The new solution enables increased automation and will empower you to apply improved transportation and logistics planning based on customer demand. Among its numerous benefits, TransPort Integrator:

- Is free of charge for your agency to use;

- Provides access to GSA's highly competitive negotiated rates, which are up to 51.9 percent less than commercial costs per shipment (July 2011 Runzheimer Report);

- Utilizes the industry's leading practices in transportation procurement, route and load planning, and execution and visibility;

- Eliminates the cost to maintain a proprietary transportation management system;

- Increases in-transit visibility;

- Streamlines transportation sourcing with automated load tendering;

- Lists detailed shipment information that promotes consistent expectations between the agency and Transportation Service Provider (TSP), especially regarding accessorials, pickup and delivery schedules;

- Provides enhanced accountability through detailed transaction history;

- Provides an integrated invoicing and payment solution through GSA's third-party payment service, PayPort Express, which is provided by Citibank using the Syncada network;

- Makes it easier for agencies to do a pre-payment audit and makes the records available for GSA's post-payment audit;

- Streamlines customer registration;

- Aids agencies in complying with sustainability-oriented Executive Order 13514; and

- Allows you to choose from more than 2,000 TSPs!

Capabilities of TransPort Integrator

- Ability to compare costs across all modes of transportation (including small parcel) to aid in best-value decision making

- Capable of supporting motor, rail, ocean, and air transportation for freight shipments

- Advanced reporting and business intelligence tools

- Offers automated shipment planning and tendering

- Supports location specific information, such as required delivery dates, pickup and delivery hours

- Automated bill of lading (BOL) generation

- Supports electronic communications between agency and TSP

- Automated event notifications
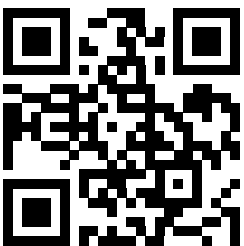

- Customer and TSP performance analysis

- Automatically sends shipment and billing information to PayPort Express

- Allows retrieval of up to 10 years of data

- Easy-to-access Web-based application offered in a Software as a Service (SaaS) model, which is hosted on IBM's Federal Community Cloud

Get Started Using TransPort Integrator

Sign up to use TransPort Integrator at https://moveit.gsa.gov/tmss/tmslog/. Once on the site, follow the instructions to register and use TransPort Integrator. It's that easy!
